

SGI CANADA Quarterly Report June 2015

Management's Discussion and Analysis

Corporate Profile

Mission

We're your insurance company, offering protection that benefits you, your family and your community.

Vision

To be a company where every customer, employee, owner and business partner across Canada is proud to do business and work with us.

Values

Integrity Conducting ourselves with honesty, trust and fairness.

Caring Acting with empathy, courtesy and respect.

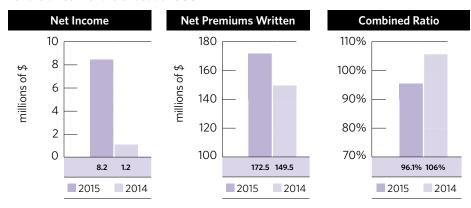

Innovation Implementing creative solutions to achieve our vision.

About SGICANADA

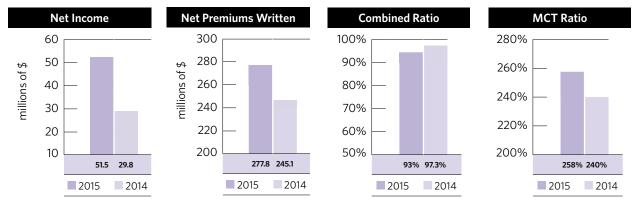

SGI CANADA is a dynamic and innovative company selling property and casualty insurance products. It currently operates as SGI CANADA in Saskatchewan, SGI CANADA Insurance Services Ltd. in Manitoba and Alberta, and Coachman Insurance Company in Ontario. The company employs about 2,000 people and its head office is located in Regina, Sask. Products are sold through a network of independent insurance brokers.

Financial Highlights

For the three months ended June 301

For the six months ended June 301

Management's Discussion and Analysis

Management's Discussion and Analysis (MD&A) provides a review of the results of the operations of SGI CANADA and its subsidiaries, SGI CANADA Insurance Services Ltd. and Coachman Insurance Company, collectively referred to as SGI CANADA or the Corporation. This discussion and analysis should be read in conjunction with the SGI CANADA unaudited consolidated financial statements and supporting notes as at and for the six-month period ended June 30, 2015, and the SGI CANADA MD&A and annual audited financial statements and supporting notes as at and for the year ended December 31, 2014. All dollar amounts are in Canadian dollars. This MD&A reflects all information known to management up to August 12, 2015.

Overview

	(thousands of \$)						
	three months ended June 30			six m	onths ended Ju	ne 30	
	2015	2014	Change	2015	2014	Change	
Net premiums written Net income from continuing	172,505	149,467	23,038	277,830	245,143	32,687	
operations	8,224	1,188	7,036	51,548	29,779	21,769	
Combined ratio	96.1%	106.0%	-9.9%	93.0%	97.0%	-4.0%	
Minimum Capital Test				258%	240%	18%	

The Corporation continues to experience premium growth with increases coming from all jurisdictions. The largest growth market for the Corporation was Alberta, which saw a 32% increase over 2014. In addition to strong premium growth, underwriting results improved due to a favourable combined expense ratio, resulting largely from low claim costs year-to-date. The strong underwriting results, combined with strong investment earnings, contributed to a profitable second quarter of 2015.

Year-to-date investment earnings increased \$8.5 million compared to the same period of 2014, generating \$35.1 million. Strong equity market returns were driven by positive foreign equity performance combined with currency gains from a declining Canadian dollar. Fixed income returns remain positive year-to-date, despite market value declines from increases in interest rates during the quarter.

Capitalization remains adequate to support the premium growth, with a Minimum Capital Test (MCT) score of 258% at June 30, 2015.

Outlook

While the first half of 2015 generated solid results, severe storms are generally more predominant on the prairies in the warm summer months of July and August, which can quickly and unfavourably impact profitability. In addition, the Corporation has exposure in Northern Saskatchewan, which continues to battle significant forest fires. To help offset the impact of catastrophic events, such as summer storms or forest fires, the Corporation spreads its insurance risk geographically and reinsures against catastrophic losses. With regards to the forest fires, SGI CANADA continues to work with its broker partners to ease the process for them and displaced customers as they return to their homes.

As part of the strategy to accelerate geographic diversification, SGI CANADA has begun to sell property and casualty insurance in British Columbia. SGI CANADA started selling a full slate of commercial property products in July and is expecting to expand to offer personal property in early 2016.

The interest rate volatility experienced during the first half of 2015 is expected to persist until macroeconomic factors normalize, driving continued variability in investment results. As interest rates begin to normalize over the next few years, subdued performance can be expected from fixed income investments. However, the relatively short

duration of the Corporation's bond portfolio should help protect against losses on fixed income investments. The Corporation continues to maintain a well-diversified, high-quality investment portfolio governed by prudent investment management policies and processes.

Revenue

	(thousands of \$)						
	three months ended June 30			six m	onths ended Ju	ne 30	
	2015	2014	Change	2015	2014	Change	
Premiums earned	142,817	124,324	18,493	280,267	245,863	34,404	
Net investment earnings	3,516	11,153	(7,637)	35,137	26,658	8,479	

Net premiums written by operating segment are noted below:

	(thousands of \$)						
	three m	nonths ended Ju	ıne 30	six months ended June 30			
	2015 2014 Change		2015	2014	Change		
Saskatchewan	127,044	117,713	9,331	217,941	201,563	16,378	
Alberta and Manitoba	32,657	25,614	7,043	56,367	43,696	12,671	
Ontario	16,296	14,288	2,008	30,361	27,012	3,349	
Gross premiums written	175,997	157,615	18,382	304,669	272,271	32,398	
Premiums ceded to reinsurers	(3,492)	(8,148)	4,656	(26,839)	(27,128)	289	
Change in net unearned premiums	(29,688)	(25,143)	(4,545)	2,437	720	1,717	
Net premiums earned	142,817	124,324	18,493	280,267	245,863	34,404	

Premiums written in Saskatchewan increased 8.1% in the first six months of 2015. Price increases resulting from rate changes, inflation and additional coverage offerings on personal lines and agro policies contributed to the majority of the increase.

Alberta operations experienced growth of 32.0% in the first six months of 2015, with auto business contributing the majority of the increase.

The increase in Ontario gross premiums written of 12.4% can be attributed primarily to increased sales volumes in personal auto and commercial lines. The mandatory auto rate decrease of 12.5%, effective July 1, 2014, has contributed to a 19.8% increase in personal auto policies in force over the prior year.

Investment earnings in the second quarter were \$7.6 million lower than the same period in 2014 due to weaker equity and fixed income returns. While income on fixed income investments remained relatively constant, increases in interest rates generated market value declines during the quarter. Equity returns were relatively flat in the quarter, compared to gains experienced in 2014.

Year-to-date investment earnings increased \$8.5 million over the same period in 2014. The majority of the increase was due to stronger equity prices in the first quarter of 2015, as fixed income returns were stable compared to the 2014 period. The year-to-date market value rate of return at June 30, 2015, was 4.0%, compared to 3.1% for same period of 2014.

Expenses

	(thousands of \$)						
	three months ended June 30			six months ended June 30			
	2015 2014 Change			2015	2014	Change	
Net claims incurred	83,536	82,476	1,060	155,261	142,882	12,379	
Other expenses	53,707	49,395	4,312	105,408	96,499	8,909	
	137,243	131,871	5,372	260,669	239,381	21,288	
Combined ratio	96.1%	106.1%	(10.0%)	93.0%	97.4%	(4.4%)	
Loss ratio	58.5%	66.3%	(7.8%)	55.4%	58.1%	(2.7%)	

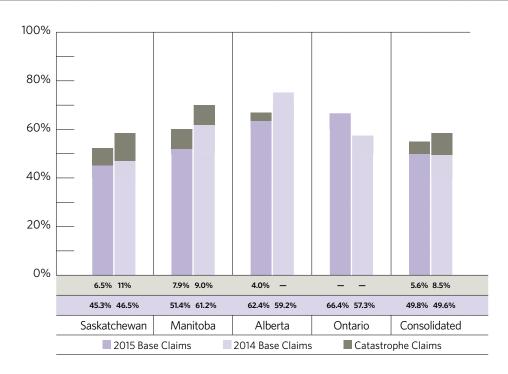

Expenses are comprised of claims incurred and other expenses, which include commissions, premium taxes, administrative expenses and the Corporation's share from participation in the Facility Association.

Claims incurred

Overall, claims incurred totalled \$155.3 million for the first six months of 2015, an increase of 8.7% over 2014. The consolidated loss ratio decreased to 55.4%, from 58.1% in 2014.

The following chart summarizes loss ratios by jurisdiction for the first six months of 2015:

Saskatchewan's six-month loss ratio of 51.8% is lower than last year's loss ratio of 57.5%. This is due primarily to improved personal and commercial lines results, which are being driven by a decrease in the number of claims combined with premium growth. Storm activity resulted in \$13.5 million in claims, compared to \$20.4 million over the same period in 2014.

Manitoba's loss ratio decreased to 59.3% from 70.2% in 2014, due primarily to improved commercial lines results, which are being driven by lower claim costs combined with a growing book of business. Storm activity resulted in \$693,000 in claims, which is comparable to the \$700,000 incurred during the same period in 2014.

Alberta's loss ratio increased to 66.4% from 59.2% in 2014, due primarily to increases in the severity of auto claims and large losses in commercial lines. As well, the first six months of 2015 included \$1.6 million in storm claims compared to no storm claims over the same period in 2014.

The Ontario loss ratio increased to 66.4% from 57.3% in 2014, due to large losses in commercial lines and an increase in the number of auto claims.

Other expenses

For the first six months, other expenses increased \$8.9 million compared to the same period in 2014. This was due largely to higher commissions and premium taxes, which is consistent with the premium growth in the quarter.

Balance Sheet Review

	(thousands of \$)				
	June 30 2015	December 31 2014	Change		
Total assets	1,190,629	1,175,332	15,297		
Key asset account changes:					
Cash and cash equivalents	31,626	18,680	12,946		
Investments	824,655	820,181	4,474		
Accounts receivable	175,424	163,911	11,513		
Unpaid claims recoverable from reinsurers	35,372	55,485	(20,113)		
Reinsurers' share of unearned premiums	19,353	11,149	8,204		

The increase in cash and cash equivalents is discussed in the Cash Flow and Liquidity section that follows. Accounts receivable increased as a result of increases in amounts due from customers and brokers, a direct result of higher premium volumes in the second quarter of 2015 compared to the fourth quarter of 2014. Unpaid claims recoverable from reinsurers decreased \$20.1 million as amounts were received from reinsurers related to recoveries on prior year storms, most notably the 2014 loss year. Reinsurers' share of unearned premiums is higher than at the end of 2014 as most annual reinsurance contracts are written during the first quarter of the year, and earned over the remainder of the year.

The carrying value of investments increased by \$4.5 million reflecting increasing market values. The investment asset mix was transitioned during the quarter, which included replacing the individual U.S. and International equity strategies with two global equity mandates, a reduction of Canadian equities in favour of more foreign equities, and the addition of global small capitalization equities and Canadian real estate strategies. The change provides further diversification to the portfolio and more flexibility to investment managers.

	(thousands of \$)				
	June 30 2015	December 31 2014	Change		
Total liabilities	847,012	870,819	(23,807)		
Key liability account changes:					
Accounts payable and accrued liabilities	32,657	40,227	(7,570)		
Dividends payable	6,250	10,622	(4,372)		
Premium taxes payable	12,437	24,080	(11,643)		
Amounts due to reinsurers	13,676	7,583	6,093		
Unearned premiums	314,458	308,691	5,767		
Provision for unpaid claims	442,485	451,584	(9,099)		

The decrease in accounts payable and accrued liabilities, dividends payable and premium taxes payable is primarily the result of timing, with significant year-end accruals being paid during the first quarter. Amounts due to reinsurers represent amounts owing related to the Corporation's reinsurance agreements, which are generally written in January and paid quarterly. The increase in unearned premiums was due to premiums written over the last 12 months being higher than in 2014. The provision for unpaid claims decreased as amounts were paid related to prior year storms, most notably from the 2014 loss year.

	(thousands of \$)				
	June 30 2015	December 31 2014	Change		
Total equity	343,617	304,513	39,104		
Key equity account changes:					
Retained earnings	263,617	224,513	39,104		

The increase in retained earnings is attributable to the \$51.5 million consolidated net income and other comprehensive income of \$56,000, offset by dividends declared of \$12.5 million. The other comprehensive income represents actuarial gains associated with the Corporation's defined benefit pension and service recognition plans.

Cash Flow and Liquidity

	(thousands of \$) six months ended June 30 2015 2014 Change				
Operating activities	9,772	4,733	5,039		
Investing activities	20,046	(7,454)	27,500		
Financing activities	(16,872)	(17,920)	1,048		
Net cash flow	12,946	(20,641)	33,587		

Cash flows from operating activities of \$9.8 million and \$20.0 million in net sales of long-term investments from investing activities was used to fund the \$16.9 million in dividend payments year-to-date and increase cash and cash equivalent securities by \$12.9 million.

Capital

As at June 30	2015	2014
Minimum Capital Test	258%	240%

The Corporation uses a common industry measurement, the Minimum Capital Test (MCT), to monitor its capital adequacy. At June 30, 2015, the Corporation's MCT was 258% (June 30, 2014 - 240%), which is in excess of the 150% minimum regulatory target. For further information on capital management, refer to note 8 of the notes to the consolidated financial statements for the quarter.

Quarterly Consolidated Financial Highlights

The following table highlights quarter-over-quarter results for SGI CANADA:

	(thousands of \$)					
	20	15	2014			
	Q 2	Q 1	Q 4	Q 3	Q 2	Q1
Net premiums written	172,505	105,325	152,109	148,787	149,467	95,676
Net premiums earned	142,817	137,450	135,250	132,565	124,324	121,539
Net claims incurred	83,536	71,725	73,558	102,934	82,476	60,406
Net income (loss)	8,224	43,324	22,657	(10,796)	1,188	28,591
Cash flow from (used in) operations	28,152	(18,380)	31,477	29,524	15,101	(4,157)
Investments	824,655	833,161	820,181	800,245	771,383	752,809
Provision for unpaid claims	442,485	442,727	451,584	461,233	438,040	395,802
Minimum Capital Test	258%	252%	227%	219%	240%	252%

The following points are intended to assist the reader in analyzing trends in the quarterly financial highlights for 2015:

- Net premiums earned generally increase on a quarter-over-quarter basis during the year.
- The first quarter generally experiences lower claims incurred compared to the rest of the year. Claims incurred can be high in the second and third quarters as a result of the summer storm season.
- With the exception of the first quarter, the Corporation generates positive cash flow from operations. Cash is typically low in the first quarter as the Corporation pays its annual premium taxes to the province in March. Operating cash flows are generally strong throughout the remaining nine months of the year and during these months excess cash generated is directed to investments.

Risk Management

Understanding and managing risk is fundamental to the Corporation's success. Risks that the Corporation manages in order to reduce the impact on its operations and profitability include competition, scale, strategy, privacy breaches, catastrophic claim losses, transfer and acquisition of expertise, employee engagement and productivity, product design and pricing, and information savvy. These risks are described in detail in the Corporation's 2014 Annual Report.

Accounting Matters

Critical accounting estimates and assumptions

There are no new critical accounting estimates or assumptions as compared to those discussed in the Corporation's 2014 Annual Report.

Related party transactions

There have been no material changes to the Corporation's related party arrangements during the quarter. For further details on the Corporation's related party arrangements, refer to the 2014 Annual Report.

Off balance sheet arrangements

SGI CANADA, in its normal course of operations, enters into certain transactions that are not required to be recorded on its Consolidated Statement of Financial Position, commonly referred to as the balance sheet. These items include litigation, structured settlements and a long-term telecommunications contract. There have been no new off balance sheet arrangements during the quarter. For further details on off balance sheet arrangements, refer to the 2014 Annual Report.

Future accounting policy changes

The following future changes to accounting standards will have applicability to the Corporation:

Insurance Contracts

In June 2013, the IASB published a revised exposure draft (2013 ED) on the accounting for insurance contracts which builds on the previous consultations undertaken in 2007 and 2010. The 2013 ED is the result of deliberations at the IASB using comments received from constituents. The ED continues to propose a new standard on accounting for insurance contracts, which would replace IFRS 4, *Insurance Contracts*. The proposals represent a comprehensive IFRS accounting model for insurance contracts and are expected to have a significant impact on the financial reporting of insurers. A final standard is expected in 2016 with implementation not expected before 2019. The Corporation is in the process of assessing the impact of the new proposed standard.

Financial Instruments: Disclosures

IFRS 7 was amended in December 2011 to require additional financial instrument disclosures upon transition from IAS 39, *Financial Instruments: Recognition and Measurement* to IFRS 9, *Financial Instruments.* The amendments are effective on adoption of IFRS 9. The amendments issued are permitted to be early adopted where IFRS 9 is also early adopted. The Office of the Superintendent of Financial Institutions (OSFI) has indicated that it will not allow early adoption of IFRS 9 for federally regulated financial institutions. While the Corporation is not federally regulated, it generally follows OSFI's guidance in such matters. The Corporation is evaluating the impact this amendment will have on the consolidated financial statements.

Financial Instruments

In July 2014, the IASB issued a final version of IFRS 9, *Financial Instruments*, as part of its plan to replace IAS 39, *Financial Instruments*: Recognition and Measurement.

The new standard requires financial assets to be measured at either fair value or amortized cost, on the basis of the entity's business model for managing the financial asset and the contractual cash flow characteristics of the financial asset. A financial asset that is held by an entity for the purpose of collecting contractual cash flows on specified dates per contractual terms should be measured at amortized cost. All other financial assets should be measured at fair value.

For equity instruments, management has an option on initial recognition to irrevocably designate on an instrument-by-instrument basis to present the changes in their fair value directly in equity. There is no subsequent recycling of fair value gains and losses from equity to the Consolidated Statement of Operations; however, dividends from such equity investments will continue to be recognized in profit or loss.

The standard includes introduction of a fair value through other comprehensive income (FVOCI) measurement category for simple debt instruments. In this measurement category, the Consolidated Statement of Financial Position will reflect the fair value carrying amount while amortized cost information is presented in the Consolidated Statement of Operations. The difference between the fair value and amortized cost information will be recognized in other comprehensive income.

This standard is effective for annual periods beginning on or after January 1, 2018. While early adoption is permitted under the standard, OSFI has indicated that early adoption is not allowed. While the Corporation is not federally regulated, it generally follows OSFI's guidance in such matters.

The Corporation is in the process of assessing the impact of the new standard.

Revenue from Contracts with Customers

IFRS 15 was issued in May 2014, and is intended to replace IAS 18 Revenue, IAS 11 Construction Contracts and related IFRICs. The standard was issued as a result of an ongoing project to align revenue recognition between IFRS and U.S. generally accepted accounting principles. This standard is effective for annual periods beginning on or after January 1, 2018. Early application is permitted. IFRS 15 contains a scope exception which excludes insurance contracts within the scope of IFRS 4 Insurance Contracts; therefore, the Corporation does not expect this standard to significantly impact the consolidated financial statements.

Presentation of Financial Statements

In December 2014, IAS 1 was amended to clarify that materiality applies to all parts of the financial statements, that an entity's share of OCI of equity-accounted associates and joint ventures should be presented in aggregate, and provides examples of how to clarify understandability and comparability in the ordering of note disclosures. The amendment is effective for annual periods beginning on or after January 1, 2016. The Corporation does not expect these amendments to significantly impact the consolidated financial statements.

Annual Improvements Cycles

In 2013, the IASB issued two exposure drafts for Annual Improvements Cycles 2010-2012 and 2011-2013, which include minor amendments to a number of IFRSs. The annual improvements process is used to make necessary but non-urgent changes to IFRSs that are not included in other projects. The amendments issued are all effective for annual periods beginning July 1, 2014. The Corporation does not expect these amendments to significantly impact the consolidated financial statements.

The IASB issued an exposure draft in December 2013 for the annual improvement cycle for 2012-2014. These amendments are effective for annual periods beginning on or after January 1, 2016. The Corporation does not expect these amendments to significantly impact the consolidated financial statements.

Caution Regarding Forward-Looking Statements

Forward-looking statements include statements regarding SGI CANADA's objectives and strategies, and its ability to achieve them. Forward-looking statements are based on estimations and assumptions made by the Corporation in light of its experience and perception of historical trends, current conditions and expected future developments, as well as other factors it believes are relevant in the circumstances. SGI CANADA deems that the assumptions built into the forward-looking statements are plausible; however, undue reliance should not be placed on the Corporation's forwardlooking statements, which only apply as of the date of this MD&A document.

Notes to the Condensed Consolidated Financial Statements (unaudited)

June 30, 2015

1. Nature of Operations

Saskatchewan Government Insurance (the Corporation or SGI), which operates under the trade name of SGI CANADA is incorporated, registered and conducts a property and casualty insurance business in the Province of Saskatchewan, and in other provinces of Canada through its wholly-owned subsidiary SGI CANADA Insurance Services Ltd. (SCISL). SCISL operates directly in Alberta and Manitoba, and in Ontario through its wholly-owned subsidiary Coachman Insurance Company (Coachman). The address of the Corporation's registered head office is 2260-11th Avenue, Regina, SK, Canada.

In many provinces in Canada, automobile insurance premium rates are regulated by provincial government authorities. Regulation of premium rates is based on claims and other costs of providing insurance coverage, as well as projected profit margins. Regulatory approvals can limit or reduce premium rates that can be charged, or delay the implementation of changes in rates. The Corporation's automobile premiums are subject to rate regulation in Alberta and Ontario, and represent approximately 16.6% (December 31, 2014 – 15.4%) of the Corporation's consolidated direct premiums written.

SGI was established as a branch of the public service by *The Government of Saskatchewan Act, 1944*, reorganized pursuant to *The Saskatchewan Government Insurance Act, 1946*, and continued under the provisions of *The Saskatchewan Government Insurance Act, 1980*. SGI also acts as administrator of the Saskatchewan Auto Fund under the provisions of *The Automobile Accident Insurance Act*. As a provincial Crown corporation, the Corporation is not subject to federal or provincial income taxes; however, SCISL and Coachman are subject to federal and provincial income taxes.

As a subsidiary of Crown Investments Corporation of Saskatchewan (CIC), the consolidated financial results of the Corporation are included in the consolidated financial statements of CIC. CIC is ultimately owned by the Government of Saskatchewan.

2. Basis of Preparation

The unaudited interim consolidated financial statements for the six month period ended June 30, 2015, have been prepared in accordance with International Financial Reporting Standards (IFRS) applicable to the preparation of interim financial statements, including International Accounting Standard 34, *Interim Financial Reporting*, and interpretations of the International Financial Reporting Interpretations Committee (IFRIC).

These unaudited interim consolidated financial statements do not include all of the note disclosures normally included in the annual financial statements. Accordingly, these interim financial statements are to be read in conjunction with the annual report for the year ended December 31, 2014. Full disclosures will be included in the consolidated annual financial statements.

Basis of measurement

The unaudited interim consolidated financial statements have been prepared using the historical cost basis, except for financial instruments and the provision for unpaid claims and unpaid claims recoverable from reinsurers. The methods used to measure the values of financial instruments are discussed further in note 3. The provision for unpaid claims and unpaid claims recoverable from reinsurers are measured on a discounted basis in accordance with accepted actuarial practice (which in the absence of an active market provides a reasonable proxy of fair value).

Statement of Financial Position classification

The Consolidated Statement of Financial Position has been prepared on a non-classified basis in order of liquidity, with a distinction based on expectations regarding recovery or settlement within 12 months after the balance sheet date (current) and more than 12 months after the balance sheet (non-current) presented in the notes.

Functional and presentation currency

These unaudited interim consolidated financial statements are presented in Canadian dollars, which is the Corporation's functional and presentation currency.

Use of estimates and judgment

The preparation of the unaudited interim consolidated financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and changes in estimates are recorded in the accounting period in which they are determined. The most significant estimation processes are related to the actuarial determination of the provision for unpaid claims and the valuation of investments classified as Level 3.

3. Significant Accounting Policies

Basis of consolidation

The unaudited interim consolidated financial statements include the accounts of the Corporation and the consolidated accounts of its 100%-owned subsidiaries, SCISL and Coachman. All inter-company accounts and transactions have been eliminated on consolidation. The financial accounting records of the subsidiaries are prepared for the same reporting year as the Corporation, using consistent accounting policies.

Discontinued operations

A disposal group is classified as assets held for sale when the Corporation expects the carrying amount to be recovered through a sales transaction rather than through continuing use. This condition is regarded as having been met when the disposal group is available for sale in its present condition and the sale is highly probable and expected to occur within one year from the date of reclassification. Disposal groups classified as held for sale are measured at the lower of their previous carrying amounts, prior to being reclassified, and fair value less costs to sell. Assets and liabilities directly associated with the disposal group are presented separately from assets and liabilities related to continuing operations. Discontinued operations are presented separately from continuing operations in the Consolidated Statement of Operations, Consolidated Statement of Changes in Equity, and the Consolidated Statement of Cash Flows.

Financial assets and liabilities

The measurement basis for financial assets and financial liabilities depends on whether the financial assets and liabilities have been classified as fair value through profit and loss, available for sale, held to maturity, loans and receivables, or other financial liabilities. Financial assets and liabilities classified as fair value through profit and loss are measured at fair value and changes in fair value are recognized in net income. Financial assets classified as available for sale are measured at fair value with unrealized changes in fair value recorded in other comprehensive income (OCI); however, unrealized losses on investments that show objective evidence of impairment are recognized as a decrease to net income. Financial assets designated as held to maturity or loans and receivables are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment losses, if any. Other financial liabilities are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method. The Corporation has no financial assets and liabilities designated as available for sale or held to maturity.

The Corporation has designated its cash and cash equivalents and investments as fair value through profit and loss. Accounts receivable are designated as loans and receivables. Accounts payable and accrued liabilities, dividend

payable and premium taxes payable are designated as other financial liabilities. Unpaid claims recoverable from reinsurers, amounts due to reinsurers and the provision for unpaid claims are exempt from the above requirement.

Financial assets and financial liabilities are offset and the net amount reported in the Consolidated Statement of Financial Position only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and liabilities simultaneously. Income and expenses are not offset in the Consolidated Statement of Operations unless required or permitted by an accounting standard or interpretation, as specifically disclosed in the accounting policies of the Corporation. There are no financial assets and financial liabilities reported as offset in these consolidated financial statements.

Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. All fair value measurements relate to recurring measurements. Fair value measurements for investments are categorized into levels within a fair value hierarchy based on the nature of the valuation inputs (Level 1, 2 or 3).

The three levels are based on the priority of inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An asset's or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities

The Corporation defines active markets based on the frequency of valuation and any restrictions or illiquidity on disposition of the underlying investment and trading volumes. Assets measured at fair value and classified as Level 1 include Canadian and U.S. common shares and pooled equity funds. Fair value is based on market price data for identical assets obtained from the investment custodian, investment managers or dealer markets. The Corporation does not adjust the quoted price for such investments.

Level 2: Quoted prices in markets that are not active or inputs that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices)

Level 2 inputs include observable market information, including quoted prices for assets in markets that are considered less active. Assets measured at fair value and classified as Level 2 include short-term investments and bonds and debentures. Fair value for short-term investments and bonds and debentures is based on, or derived from, market price data for same or similar instruments obtained from the investment custodian, investment managers or dealer markets.

Level 3: Unobservable inputs that are supported by little or no market activity and are significant to the estimated fair value of the assets or liabilities

Level 3 assets and liabilities would include financial instruments whose values are determined using internal pricing models, discounted cash flows methodologies, or similar techniques that are not based on observable market data, as well as instruments for which the determination of estimated fair value requires significant management judgment or estimation. Assets classified as Level 3 include the pooled mortgage fund. The fair value for the pooled mortgage fund is determined based on the market values of the underlying mortgage investments, calculated by discounting scheduled cash flows through to the estimated maturity of the mortgages (using spread-based pricing, over Government of Canada bonds with a similar term to maturity), subject to adjustments for liquidity and credit risk.

The fair value of other financial assets and financial liabilities is considered to be the carrying value when they are of short duration or when the investment's interest rate approximates current observable market rates. Where other financial assets and financial liabilities are of longer duration, then fair value is determined using the discounted cash flow method using discount rates based on adjusted observable market rates. The fair values of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, dividend payable and premium taxes payable approximate their carrying values due to their short-term nature.

Investments

The Corporation records its investment purchases and sales on a trade-date basis, being the date when the transactions are entered into. Financial assets are derecognized when the rights to receive cash flows from them have expired, or when the Corporation has transferred substantially all risks and rewards of ownership.

Investments under securities lending program

Securities lending transactions are entered into on a collateralized basis. The securities lent are not derecognized on the Consolidated Statement of Financial Position given that the risks and rewards of ownership are not transferred from the Corporation to the counterparties in the course of such transactions. The securities are reported separately on the Consolidated Statement of Financial Position on the basis that the counterparties may resell or re-pledge the securities during the time that the securities are in their possession.

Securities received from counterparties as collateral are not recorded on the Consolidated Statement of Financial Position given that the risks and rewards of ownership are not transferred from the counterparties to the Corporation in the course of such transactions.

Investment earnings

The Corporation recognizes interest and premium financing as earned, dividends when declared, pooled fund revenue when a distribution is declared, realized gains and losses on investments when the investment has been sold and unrealized gains and losses based on the changes in market value of the investments held at the period-end date.

Interest revenue includes amortization of any premium or discount recognized at the date of purchase of the security. Amortization is calculated using the effective interest method. Realized gains and losses represent the difference between the amounts received through the sale of investments and their respective cost base. Interest is generally receivable on a semi-annual basis.

Direct investment expenses, such as external custodial, investment management and investment consultant expenses, are recorded against investment earnings.

Foreign currency translation

Monetary assets and liabilities denominated in foreign currency are translated at the exchange rate in effect at the period-end date. Revenues and expenses are translated at the exchange rate in effect at the transaction date. Unrealized foreign exchange gains and/or losses arising on monetary and non-monetary investments designated as fair value through profit and loss are recognized in investment earnings. Unrealized gains and/or losses arising on translation are charged to operations in the current period. Translation gains and/or losses related to other financial assets and liabilities are charged to operations in the current period.

Premiums written

The Corporation's policies have all been classified upon inception as insurance contracts. An insurance contract is a contract that transfers significant insurance risk and, upon the occurrence of the insured event, causes the insurer to make a benefit payment to the insured party. The sale of policies generates premiums written and are taken into income as net premiums earned over the terms of the related policies, no longer than 12 months. The portion of the policy premiums relating to the unexpired term of each policy is recorded as an unearned premium liability on the Consolidated Statement of Financial Position.

At the end of each reporting period, a liability adequacy test is performed, in accordance with IFRS, to validate the adequacy of unearned premiums and deferred policy acquisition costs. A premium deficiency would exist if unearned premiums are deemed insufficient to cover the estimated future costs associated with the unexpired portion of written insurance policies. A premium deficiency would be recognized immediately as a reduction of deferred policy acquisition costs to the extent that unearned premiums plus anticipated investment income is not considered adequate to cover all deferred policy acquisition costs and related insurance claims and expenses. If the premium deficiency is greater than the unamortized deferred policy acquisition costs, a liability is accrued for the excess deficiency.

Provision for unpaid claims

The provision for unpaid claims represents an estimate of the total cost of outstanding claims to the period end date. The estimate includes the cost of reported claims, claims incurred but not reported, and an estimate of adjustment expenses to be incurred on these claims and a provision for adverse deviation (PFAD) in accordance with Canadian Institute of Actuaries standards. The estimates are subject to uncertainty and are selected from a range of possible outcomes. During the life of the claim, adjustments to the estimates are made as additional information becomes available. The change in outstanding losses plus paid losses is reported as claims incurred in the current period.

Deferred policy acquisition costs

Premium taxes, commissions and certain underwriting and policy issuance costs are deferred, to the extent they are recoverable, and charged to expense over the terms of the insurance policies to which such costs relate, no longer than 12 months.

Reinsurance ceded

The Corporation uses various types of reinsurance to limit its maximum insurance risk exposure. Estimates of amounts recoverable from reinsurers in respect of insurance contract liabilities and their share of unearned premiums are recorded as reinsurance assets on a gross basis in the Consolidated Statement of Financial Position. Unpaid claims recoverable from reinsurers, reinsurers' share of unearned premiums and unearned reinsurance commissions are estimated in a manner consistent with the method used for determining the provision for unpaid claims, unearned premiums and deferred policy acquisition costs respectively. Insurance ceded does not relieve the Corporation of its primary obligation to policyholders.

Income taxes

The Corporation uses the asset and liability method of accounting for income taxes. Income taxes are comprised of both current and deferred taxes. Income taxes are recognized in the Consolidated Statement of Operations.

Current income taxes are recognized as estimated income taxes for the current year. Deferred income tax assets and liabilities consist of temporary differences between tax and accounting bases of assets and liabilities, as well as the benefit of losses available to be carried forward to future years for tax purposes that are likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the date of enactment or substantive enactment. A valuation allowance is recorded against any deferred income tax asset if it is probable that the asset will not be realized, probable being defined as more likely than not.

Employees' future benefits

The Corporation provides a defined contribution pension plan, a defined benefit pension plan and defined benefit service recognition plans that provide retirement benefits for its employees.

For the defined contribution pension plan, the Corporation's obligations are limited to contributions made for current service. When made, these contributions are charged to income.

The Corporation's defined benefit pension plan is available to certain of its employees and it has been closed to new membership since 1980. The plan provides a full pension at retirement calculated as 2% of a member's average earnings during the five years of highest earnings, multiplied by the total number of years of service to a maximum of 35 years. The plan may be indexed at the discretion of the Board of Directors. The plan is pre-funded by payments from employee and employer contributions which are made to a separately administered fund and are determined by periodic actuarial calculations taking into account the recommendations of a qualified actuary.

Responsibility for governance of the plan lies with the Corporation. The Corporation has a pension committee to assist in the management of the plan and has also appointed experienced, independent professional experts such as investment managers, an actuary, and a custodian.

Plan assets consist primarily of fixed income and equity pooled funds and are carried at fair value. Plan assets are not available to creditors of the Corporation nor can they be paid directly to the Corporation.

For the defined benefit plan:

- (i) Net interest on the accrued pension liability is recognized in net income.
- (ii) Pension obligations are determined by an independent actuary using the projected unit credit method prorated on service and management's best estimate assumptions of expected plan investment performance, salary escalation, age at retirement, mortality of members and future pension indexing, based upon the consumer price index.
- (iii) The discount rate used to determine the accrued benefit obligation and the expected return on plan assets was determined by reference to market interest rates at the measurement date of high-quality debt instruments that are denominated in the currency in which the benefits will be paid with cash flows that match the timing and amount of expected benefit payments.
- (iv) Past service costs are expensed immediately.
- (v) Actuarial gains and losses are recognized in OCI in the period in which they arise.

The accrued benefit asset (liability) is the fair value of plan assets out of which the obligation is to be settled directly, less the present value of the defined benefit obligation. It is restricted to the present value of the economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

By design, the plan exposes the Corporation to the typical risks faced by defined benefit pension plans such as investment performance, changes to the discount rate used to value the obligation, longevity of plan members, and future price inflation. Pension risk is managed by established policies, regular monitoring, re-evaluation and potential adjustments of these policies as future events unfold.

The Corporation provides defined benefit service recognition plans for certain management and in-scope (union) employees for the purpose of providing retirement benefits. Employees in the plans are eligible for benefits at the earlier of age plus service equal to or greater than 75, or age 50. Upon retirement, employees meeting the eligibility criteria receive a lump sum payment of five days for management and three days for in-scope (union) employees for each year of continuous service less ineligible time and ineligible partial service time. A participant who dies while a member of either plan is deemed to satisfy the eligibility requirements. The member's beneficiary or estate will receive the same benefit payment based on the calculation. Effective December 31, 2011, the defined benefit service recognition plan for the unionized employees was frozen for current employees and closed to new employees. Effective December 31, 2011, the defined benefit service recognition plan for the management employees was closed to new employees, and the current employees were provided the option to elect to remain in the plan or to receive an annual payout, commencing in 2012.

The accrued benefit obligation of the service recognition plans is funded by the Corporation as eligible employees terminate employment. The cost of the plans is determined using the projected unit credit method prorated on service. The expected costs of these benefits are accrued over the period of employment using an accounting methodology similar to that for the defined benefit pension plan. Obligations under these plans are determined annually by an independent actuary.

By design, the service recognition plans expose the Corporation to risks such as changes to the discount rate used to value the obligation, expected salary increases, and duration of employee service. These risks are managed by established policies, regular monitoring, re-evaluation and potential adjustments of these policies as future events unfold.

Cash and cash equivalents

Cash and cash equivalents consist of money market investments with a maturity of 90 days or less from the date of acquisition, and are presented net of cash on hand, less outstanding cheques.

Property and equipment

All classes of property and equipment are recorded at cost less accumulated depreciation and accumulated impairment, if any. Cost includes expenditures that are directly attributable to the acquisition of the asset. In the case of land, building and building components, fair value upon transition to IFRS has been used as the deemed cost.

The Corporation has not incurred any borrowing costs attributable to property and equipment and therefore no borrowing costs have been capitalized. Subsequent costs are included in the assets' carrying value when it is probable that future economic benefits associated with the item will flow to the Corporation and the cost of the item can be reliably measured. Repairs and maintenance are charged to the Consolidated Statement of Operations in the period in which they have been incurred.

The depreciation method being used, the useful lives of the assets and the residual values of the assets are reviewed at each reporting date.

Depreciation is recorded in operations on a straight-line basis, commencing in the year the asset is available to be placed in service, over the estimated useful lives as follows:

> Building 40 years **Building components** 15-30 years Computer software, hardware and other equipment 3-5 years

Building components consists of heating and cooling systems, elevators, roofs and parking lots.

Land is not subject to amortization and is carried at cost.

Impairment reviews are performed when there are indicators that the carrying value of an asset may exceed its recoverable amount.

Leased assets

Leases where the Corporation does not assume substantially all of the risks and reward of ownership are classified as operating leases. The payments are expensed as they are incurred.

Provisions and contingent liabilities

Provisions are recognized when the Corporation has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Contingent liabilities are disclosed if there is a possible future obligation as a result of a past event, or if there is a present obligation as a result of a past event but either a payment is not probable or the amount cannot be reasonably estimated.

Structured settlements

In the normal course of claims adjudication, the Corporation settles certain long-term claims losses through the purchase of annuities under structured settlement arrangements with life insurance companies. As the Corporation does not retain any interest in the related insurance contract and obtains a legal release from the claimant, any gain or loss on the purchase of the annuity is recognized in the Consolidated Statement of Operations at the date of the purchase and the related claims liabilities are derecognized. However, the Corporation remains exposed to the credit risk that the life insurance companies may fail to fulfil their obligations.

Comprehensive income

Comprehensive income consists of net income and OCI. OCI includes net actuarial gains (losses) on the employee defined benefit pension plan and service recognition plans. These items of OCI are not reclassified subsequently to net income.

Future accounting policy changes

The following future changes to accounting standards will have applicability to the Corporation:

IFRS 4 - Insurance Contracts

In June 2013, the IASB published a revised exposure draft (2013 ED) on the accounting for insurance contracts which builds on the previous consultations undertaken in 2007 and 2010. The 2013 ED is the result of deliberations at the IASB using comments received from constituents. The ED continues to propose a new standard on accounting for insurance contracts, which would replace IFRS 4, *Insurance Contracts*. The proposals represent a comprehensive IFRS accounting model for insurance contracts and are expected to have a significant impact on the financial reporting of insurers. A final standard is expected in 2016 with implementation not expected before 2019. The Corporation is in the process of assessing the impact of the new proposed standard.

IFRS 7 - Financial Instruments: Disclosures

IFRS 7 was amended in December 2011 to require additional financial instrument disclosures upon transition from IAS 39, *Financial Instruments: Recognition and Measurement* to IFRS 9, *Financial Instruments.* The amendments are effective on adoption of IFRS 9. The amendments issued are permitted to be early adopted where IFRS 9 is also early adopted. The Office of the Superintendent of Financial Institutions (OSFI) has indicated that it will not allow early adoption of IFRS 9 for federally regulated financial institutions. While the Corporation is not federally regulated, it generally follows OSFI's guidance in such matters. The Corporation is evaluating the impact this amendment will have on the consolidated financial statements.

IFRS 9 - Financial Instruments

In July 2014, the IASB issued a final version of IFRS 9, *Financial Instruments*, as part of its plan to replace IAS 39, *Financial Instruments*: Recognition and Measurement.

The new standard requires financial assets to be measured at either fair value or amortized cost, on the basis of the entity's business model for managing the financial asset and the contractual cash flow characteristics of the financial asset. A financial asset that is held by an entity for the purpose of collecting contractual cash flows on specified dates per contractual terms should be measured at amortized cost. All other financial assets should be measured at fair value.

For equity instruments, management has an option on initial recognition to irrevocably designate on an instrument-by-instrument basis to present the changes in their fair value directly in equity. There is no subsequent recycling of fair value gains and losses from equity to the Consolidated Statement of Operations; however, dividends from such equity investments will continue to be recognized in profit or loss.

The standard includes introduction of a fair value through other comprehensive income (FVOCI) measurement category for simple debt instruments. In this measurement category, the Consolidated Statement of Financial Position will reflect the fair value carrying amount while amortized cost information is presented in the Consolidated Statement of Operations. The difference between the fair value and amortized cost information will be recognized in other comprehensive income.

This standard is effective for annual periods beginning on or after January 1, 2018. While early adoption is permitted under the standard, OSFI has indicated that early adoption is not allowed. While the Corporation is not federally regulated, it generally follows OSFI's guidance in such matters.

The Corporation is in the process of assessing the impact of the new standard.

IFRS 15 - Revenue from Contracts with Customers

IFRS 15 was issued in May 2014, and is intended to replace IAS 18 Revenue, IAS 11 Construction Contracts and related IFRICs. The standard was issued as a result of an ongoing project to align revenue recognition between IFRS and U.S. generally accepted accounting principles. This standard is effective for annual periods beginning on or after January 1, 2018. Early application is permitted. IFRS 15 contains a scope exception which excludes insurance contracts within the scope of IFRS 4 Insurance Contracts, therefore, this standard will have a limited impact on the Corporation.

IAS 1 - Presentation of Financial Statements

In December 2014, IAS 1 was amended to clarify that materiality applies to all parts of the financial statements, that an entity's share of OCI of equity-accounted associates and joint ventures should be presented in aggregate, and provides examples of how to clarify understandability and comparability in the ordering of note disclosures. The amendment is effective for annual periods beginning on or after January 1, 2016. The Corporation does not expect these amendments to significantly impact the consolidated financial statements.

Annual Improvements Cycles

In 2013, the IASB issued two exposure drafts for Annual Improvements Cycles 2010-2012 and 2011-2013, which include minor amendments to a number of IFRSs. The annual improvements process is used to make necessary but non-urgent changes to IFRSs that are not included in other projects. The amendments issued are all effective for annual periods beginning July 1, 2014. The Corporation does not expect these amendments to significantly impact the consolidated financial statements.

The IASB issued an exposure draft in December 2013 for the annual improvement cycle for 2012-2014. These amendments are effective for annual periods beginning on or after January 1, 2016. The Corporation does not expect these amendments to significantly impact the consolidated financial statements.

4. Discontinued Operations

During the first quarter of 2014, the Corporation announced that it had entered into an agreement to sell the shares of its 75%-owned subsidiary, ICPEI, for a purchase price equal to ICPEI's book value as at the transaction closing date, June 30, 2014. Following receipt of regulatory approval, the sale closed on June 30, 2014, for total proceeds of \$8,840,000 representing the book value as at June 30, 2014. Subsequent to quarter end, the purchase price was adjusted by \$131,000 to \$8,709,000. This transaction was recorded in the fourth quarter, as reported in the 2014 annual audited consolidated financial statements.

As part of the sale agreement, 54 months after the closing date, the purchaser shall deliver to the Corporation a report of the ultimate losses prior to June 30, 2014, certified by the purchaser's appointed actuary. If the amount of the final closing date ultimate loss is greater than the initial closing date ultimate loss, a deficiency, the Corporation shall pay to the purchaser an amount equal to the lesser of \$1,500,000 or 75% of the deficiency. Conversely, if the amount of the final closing date ultimate loss is less than the initial closing date ultimate loss, a surplus, the purchaser shall pay to the Corporation an amount equal to the lesser of \$1,500,000 or 75% of the surplus. The purchaser is required to provide the Corporation with an estimate of the amount annually. As at December 31, 2014, a surplus of \$244,000 was estimated which has not been recorded in these Consolidated Financial Statements.

The ICPEI operations represented a separate segment of business for the Corporation. As a result of the sale, these operations have been treated as discontinued operations and include the results of ICPEI to June 30, 2014, the transaction close date. A single amount is shown on the Consolidated Statement of Operations comprising the posttax result of the discontinued operations. In the Consolidated Statement of Cash Flows, the cash provided (utilized) by the activities of ICPEI has been separated from that of the rest of the Corporation. The Consolidated Statement of Operations, Consolidated Statement of Changes in Equity, and the Consolidated Statement of Cash Flows of prior periods have been restated to conform to this presentation format.

Loss from the discontinued operation is presented below.

	(tho	usands of \$)
	three months ended June 30 2014	
Gross premiums written	\$ 8,019	5 \$ 13,440
Premiums ceded to reinsurers	673	3 (430)
Net premiums written	8,688	3 13,010
Change in net unearned premiums	(2,537	7) (951)
Net premiums earned	6,153	1 12,059
Net claims incurred	6,147	7 10,409
Commissions	1,006	2,068
Administrative expenses	1,116	5 1,862
Premium taxes	245	5 485
Facility Association participation	114	46
Total claims and expenses	8,628	14,870
Underwriting loss	(2,47	7) (2,811)
Investment earnings	262	791
Loss before income taxes	(2,21	5) (2,020)
Income tax recovery	(620	0) (486)
Loss from discontinued operations	(1,59	5) (1,534)
Administrative expenses from SGI CANADA	359	719
Net loss from discontinued operations	\$ (1,236	6) \$ (815)

ICPEI's administrative expenses include \$719,000 of expenses allocated from its parent, SGI CANADA. As the related expenses are expected to continue after completion of the sale transaction, these expenses are added back to net income from discontinued operations and shown as an expense in continued operations.

5. Investments

The carrying and fair values of the Corporation's investments are as follows:

	(thousands of \$)				
	June 30 2015	D	ecember 31 2014		
Short-term investments	\$ 100,725	\$	109,465

	64,887		93,473		
Total investments	\$ 824,655	\$	820,181		

Securities lending program

Through its custodian, the Corporation participates in an investment securities lending program for the purpose of generating fee income. When securities are loaned, the Corporation is exposed to counterparty risk, which is the risk that the borrower will not return the loaned securities, or if the collateral is liquidated, it may be for less than the value of the loan. The Corporation mitigates this risk through non-cash collateral and a guarantee provided by its custodian. Non-cash collateral of at least 102% of the market value of the loaned securities is retained by the Corporation until the loaned securities have been returned. The market value of the loaned securities is monitored on a daily basis with additional collateral obtained or refunded as the market value of the loaned securities fluctuates. In addition, the custodian provides indemnification against any potential losses in the securities lending program. While in the possession of counterparties, the loaned securities may be resold or re-pledged by such counterparties.

At June 30, 2015, the Corporation held collateral of \$68,134,000 (December 31, 2014 - \$98,156,000) for the loaned securities.

Fair value hierarchy

Fair value is best evidenced by an independent quoted market price for the same instrument in an active market. An active market is one where quoted prices are readily available, representing regularly occurring transactions. The determination of fair value requires judgment and is based on market information where available and appropriate. Fair value measurements are categorized into levels within a fair value hierarchy based on the nature of the inputs used in the valuation.

	(thousands of \$)

	\$	209,812	\$	512,371	\$	97,998	\$	820,181		

The Corporation's policy is to recognize transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer.

A reconciliation of Level 3 investments is as follows:

	(thousands of \$)								
		three months	ende	d June 30	six months ended June 30			June 30	
	2015		2014		2015			2014	
Balance beginning of the period	\$	101,358	\$	72,424	\$	97,998	\$		
Additions during the period									
Mortgage pooled fund		3,000		17,927		4,200		88,920	
Real estate fund		5,290		_		5,290		-	
Net unrealized gains		291		1,156		2,451		2,587	
	\$	109,939	\$	91,507	\$	109,939	\$	91,507	

Investment in the mortgage pooled fund is valued using the Corporation's share of the net asset value of the mortgage pooled fund as at June 30.

During the six month period ended June 30, no investments were transferred between levels. During the first quarter of 2014, the Corporation transferred the mortgage pooled fund from Level 2 to Level 3 to be consistent with the investment manager's classifications.

6. Investment Earnings

The components of investment earnings are as follows:

	(thousands of \$)									
	three months ended June 30					six months ended June 30				
	2015	5	2014		2015			2014		
Net realized gains on sale of investments	\$ 2	9,704	\$	3,527	\$	38,953	\$	7,669

7. Insurance and Financial Risk Management

The Corporation has established an enterprise risk management policy. The Board of Directors approved this policy, and management is responsible for ensuring it is properly maintained and implemented. The Board of Directors receives confirmation that the risks are being appropriately managed through regular reporting from management.

Insurance risk arises with respect to the adequacy of the Corporation's insurance premium rates and provision for unpaid claims (consisting of underwriting and actuarial risks). The nature of insurance operations also results in significant financial risks, as the Corporation's Statement of Financial Position consists primarily of financial instruments. The financial risks that arise are credit risk, market risk (consisting of interest rate risk, foreign exchange risk and equity price risk) and liquidity risk.

Insurance risk

Underwriting risk

The Corporation manages its insurance risk through its underwriting and reinsurance strategies within an overall strategic planning process. Pricing is based on assumptions with regards to past experiences and trends. Exposures are managed by having documented underwriting limits and criteria, product and geographic diversification and reinsurance.

Diversification

The Corporation writes property, liability and motor risks over a 12-month period. The most significant risks arise from weather-related events, such as severe summer storms. The Corporation attempts to mitigate risk by conducting business in a number of provinces across Canada and by offering different lines of insurance products.

The concentration of insurance risk by region and line of business is summarized below by reference to gross premiums written:

	(thousands of \$)									
six months ended June 30, 2015	Automobile	Personal Property	Commercial Property	Liability	Total					
Saskatchewan	\$ 79,415	\$ 94,952	\$ 25,021	\$ 18,553	\$ 217,941

Total	\$ 442,485	\$ 451,584	\$ 35,372	\$ 55,485	\$ 407,113	\$ 396,099						

Reinsurance

The Corporation also seeks to reduce losses that may arise from catastrophes or other events that cause unfavourable underwriting results by reinsuring certain levels of risk with other insurers.

The policy of underwriting and reinsuring contracts of insurance limits the liability of the Corporation to a maximum amount on any one loss as follows:

	(thousa	nds o	f \$)
	2015		2014
Dwelling and farm property	\$ 1,000	\$	800
Unlicensed vehicles	1,000		800
Commercial property	1,000		1,250
Automobile and general liability	1,500		1,500

In addition, the Corporation carries property and auto physical damage catastrophe reinsurance limiting combined exposure to \$12,500,000 per event (subject to an annual aggregate deductible of \$6,250,000). In 2014, the Corporation carried similar coverage, although only covering property losses with no annual aggregate deductible.

While the Corporation utilizes reinsurance, it is still exposed to reinsurance risk. Reinsurance risk is the risk of financial loss due to inadequacies in reinsurance coverage or the default of a reinsurer. The Corporation evaluates and monitors the financial condition of its reinsurers to minimize its exposure to significant losses from reinsurer insolvency.

Actuarial risk

The establishment of the provision for unpaid claims is based on known facts and interpretation of circumstances and is therefore a complex process influenced by a variety of factors. Measurement of the provision is uncertain due to claims that are not reported to the Corporation at the period end date and therefore estimates are made as to the value of these claims. As well, uncertainty exists regarding the cost of reported claims that have not been settled, as all the necessary information may not be available at the period end date.

The significant assumptions used to estimate the provision include: the Corporation's experience with similar cases, historical claim payment trends and claim development patterns, the characteristics of each class of business, claim severity and claim frequency, the effect of inflation on future claim settlement costs, court decisions and economic conditions. Time is also a critical factor in determining the provision, since the longer it takes to settle and pay a claim, the more variable the ultimate settlement amount will be. Accordingly, short-tail claims such as physical damage or collision claims tend to be more reasonably predictable than long-tail claims such as liability claims.

As a result, the establishment of the provision for unpaid claims relies on a number of factors, which necessarily involves risk that actual results may differ materially from the estimates.

Financial risk

The nature of the Corporation's operations result in a Consolidated Statement of Financial Position that consists primarily of financial instruments. The risks that arise are credit risk, market risk (consisting of interest rate risk, foreign exchange risk and equity price risk) and liquidity risk.

Significant financial risks are related to the Corporation's investments. These financial risks are managed by having a Statement of Investment Policies and Goals (SIP&G), which is approved annually by the Corporation's Board of Directors. The SIP&G provides guidelines to the investment managers for the asset mix of the portfolio regarding quality and quantity of debt and equity investments using a prudent person approach. The asset mix helps to reduce the impact of market value fluctuations by requiring investments in different asset classes and in domestic and foreign markets. The Corporation receives regular reporting from the investment managers and custodian regarding compliance with the SIP&G. The investment managers' performance is evaluated based on return objectives, including realized and unrealized capital gains and losses plus income from all sources, and goals stated in the SIP&G.

Credit risk

The Corporation's credit risk arises primarily from two distinct sources: accounts receivable (from its customers, brokers and reinsurers) and certain investments.

The maximum credit risk to which the Corporation is exposed is limited to the carrying value of the financial assets summarized as follows:

		(thousands of \$)				
		June 30 2015	D	ecember 31 2014		
Cash and cash equivalents	\$	31,626	\$	18,680		
Accounts receivable		175,424		163,911		
Fixed income investments ¹		615,742		610,369		
Unpaid claims recoverable from reinsurers	35,372 55,48			55,485		

¹ Includes short-term investments, bonds and debentures, and the mortgage pooled fund

In addition, the Corporation is exposed to credit risk associated with its structured settlements as described separately in the notes to the annual consolidated financial statements.

Cash and cash equivalents include money market investments of \$40,931,000 less bank overdraft, net of outstanding cheques of \$9,305,000 (December 31, 2014 - money market investments of \$32,358,000 less bank overdraft, net of outstanding cheques of \$13,678,000). The money market investments mature within 90 days from the date of acquisition and have a credit rating of R-1.

Accounts receivable are primarily from customers, diversified among residential, farm and commercial, along with amounts from brokers across the provinces that the Corporation operates in. Accounts receivable consist of balances outstanding for one year or less.

	(thousands of \$)				
	June 30 Decer 2015 20				
Current	\$	173,320	\$	163,381	
30 - 59 days		933		910	
60 - 90 days		616		332	
Greater than 90 days		8,633		6,538	
Subtotal		183,502		171,161	
Allowance for doubtful accounts		(8,078)		(7,250)	
Total	\$	175,424	\$	163,911	

Provisions for credit losses are maintained in an allowance account and are regularly reviewed by the Corporation. Amounts are written off once reasonable collection efforts have been exhausted.

Details of the allowance account are as follows:

	(thousands of \$)				
		June 30 2015	D	ecember 31 2014	
Allowance for doubtful accounts	\$	7,250	\$	5,722	
Allowance related to discontinued operations		-		(48)	
Accounts written off		(958)		(1,523)	
Current period provision		1,786		3,099	
Allowance for doubtful accounts	\$	8,078	\$	7,250	

Concentrations of credit risk for insurance contracts can arise from reinsurance ceded contracts as insurance ceded does not relieve the Corporation of its primary obligation to the policyholder. Reinsurers are typically all required to have a minimum financial strength rating of A- at the inception of the treaty; rating agencies used are A.M. Best and Standard & Poor's. Guidelines are also in place to establish the maximum amount of business that can be placed with a single reinsurer.

Credit risk within investments is related primarily to short-term investments, bonds and debentures, and the mortgage pooled fund. It is managed through the investment policy that limits debt instruments to those of high credit quality (minimum rating for bonds and debentures is BBB, and for short-term investments is R-1) along with limits to the maximum notional amount of exposure with respect to any one issuer.

Credit ratings for the bond and debenture investments are as follows:

	June 30	0, 2015	December 31, 2014				
Credit Rating	Fair Value Makeup of (thousands of \$) Portfolio (%)			Fair Value ousands of \$)	Makeup of Portfolio (%)		
AAA	\$ 139,633	34.0	\$	126,317	31.4		
AA	110,592	27.0		122,821	30.5		
A	98,041	23.9		96,025	23.8		
BBB	62,132	15.1		57,743	14.3		
Total	\$ 410,398	100.0	\$	402,906	100.0		

Within bonds and debentures, there are no holdings from one issuer, other than the Government of Canada or a Canadian province, over 10% of the market value of the combined bond and short-term investment portfolios. No one holding of a province is over 20% of the market value of the bond portfolio.

The unit value of the mortgage pooled fund is impacted by the credit risk of the underlying mortgages. This risk is limited by restrictions within its own investment policy, which include single loan limits, diversification by property type and geographic regions within Canada. Each underlying mortgage is secured by real estate and related contracts.

Market risk

Market risk represents the potential for loss from changes in the value of financial instruments. Value can be affected by changes in interest rates, foreign exchange rates and equity prices. Market risk primarily impacts the value of investments.

Interest rate risk

The Corporation is exposed to changes in interest rates in its fixed income investments, including short-term investments, bonds and debentures and the mortgage pooled fund. Changes in interest rates also impact the provision for unpaid claims and unpaid claims recoverable from reinsurers. The impact that a change in interest rates has on investment income will be partially offset by the impact the change in interest rates has on discounting of claims incurred.

It is estimated that a 100 basis point increase/decrease in interest rates would have the following impact:

	(thousands of \$)									
	100 basis point increase					100 basis point decrease				
		June 30 2015	December 31 2014			June 30 2015	D	ecember 31 2014		
Investment earnings	\$	(11,058)	\$	(11,915)	\$	11,058	\$	11,915		
Net claims incurred		(10,217)		(9,549)		10,217		9,549		
Net income before income taxes		(841)		(2,366)		841		2,366		

Foreign exchange risk

The investment policy defines maximum limits to exchange rate sensitive assets within the investment portfolio. The following table indicates the exposure to exchange rate sensitive assets and provides the sensitivity to a 10% appreciation/depreciation in the Canadian dollar and the corresponding decrease/increase in net income and retained earnings:

	Maximum Exposure (%)	Current Exposure (%)		inge in exchange housands of \$)
Asset Class	June 30, 2015	e 30, 2015 June 30, 2015		ne 30, 2015
Global equities	16.0	12.8	\$	10,551
Global small cap equities	4.0	2.6		2,120

	Maximum Exposure (%)	Current Exposure (%)		nge in exchange nousands of \$)
Asset Class	December 31, 2014	December 31, 2014	Decen	nber 31, 2014
U.S. equities	14.0	10.0	\$	8,175
Non-North American equities	9.0	6.3		5,158

As global equity funds are classified as fair value through profit and loss, any unrealized changes due to foreign currency are recorded in net income. There is no exposure to foreign exchange risk within the Corporation's bond and debenture portfolio. As well, no more than 10% of the market value of the bond portfolio shall be invested in bonds of foreign issuers. The Corporation's exposure to exchange rate risk resulting from the purchase of goods and services, and claims and reinsurance receivables and payables, are not considered material to the operations of the Corporation.

Equity prices

The Corporation is exposed to changes in equity prices in Canadian and global markets. Equities comprise 24.7% (December 31, 2014 – 25.6%) of the carrying value of the Corporation's total investments. Individual stock holdings are diversified by geography, industry type and corporate entity. No one investee or related group of investees represents greater than 10% of the market value of the Corporation's common share portfolio. As well, no one holding represents more than 10% of the voting shares of any corporation.

The Corporation's equity price risk is assessed using Value at Risk (VaR), a statistical technique that measures the potential change in the value of an asset class. The VaR has been calculated based on volatility over a four-year period, using a 95% confidence level. As such, it is expected that the annual change in the portfolio market value will fall within the range outlined in the following table 95% of the time (19 times out of 20 years).

	(thousands of \$)						
Asset Class		June 3	80, 2015		Decembe	er 31, 2014	
Canadian equities	\$	+/-	15,530	\$	+/-	22,409	
Global equities		+/-	27,878		+/-	-	
Global small cap equities		+/-	5,089		+/-	-	
U.S. equities		+/-	_		+/-	22,728	
Non-North American equities		+/-	_		+/-	13,410	

The Corporation's equity investments are classified as fair value through profit and loss and as such, any unrealized changes in their fair value are recorded in the Consolidated Statement of Operations.

No derivative financial instruments have been used to alter the effects of market changes and fluctuations.

Liquidity risk

Liquidity risk is the risk that the Corporation is unable to meet its financial obligations as they fall due. Cash resources are managed on a daily basis based on anticipated cash flows. The majority of financial liabilities, excluding certain unpaid claims liabilities, are short-term in nature, due within one year. The Corporation generally maintains positive overall cash flows through cash generated from operations, as well as cash generated from its investing activities.

8. Capital Management

The Corporation's primary objectives when managing capital are to ensure adequate funding is available to pay policyholder claims, be flexible in its product offerings and support its growth strategies, while providing an adequate return to its shareholder. Its main sources of capital are retained earnings and cash injections in the form of equity advances from its parent, CIC. There were no changes to the Corporation's capital structure during the period.

SGI CANADA is not a regulated insurer; however, its subsidiaries, SGI CANADA Insurance Services Ltd., and Coachman Insurance Company, are subject to rate regulation related to their automobile premiums. Although not federally regulated, SGI CANADA has chosen to follow the guidance provided by the Office of the Superintendent of Financial Institutions (OSFI) in determining and monitoring capital targets.

The Corporation uses a common industry measurement, the Minimum Capital Test (MCT), to monitor its capital adequacy. The MCT is a risk-based capital adequacy formula that assesses risks to assets, policy liabilities and off balance sheet exposures by applying various factors to determine a ratio of capital available over capital required.

The Board of Directors has approved Capital Management policies for the Corporation, and each of its subsidiaries, prepared in accordance with Guideline A-4, Regulatory Capital and Internal Capital Targets, which OSFI issued in January 2014. The policies establish internal MCT targets, in excess of 150%, which are used by the regulators as minimum targets for supervisory purposes. The policies also establish operating MCT targets that provide for an operating cushion above the internal targets. The Corporation and its subsidiaries maintain MCTs in excess of their internal targets.

9. Change in Non-Cash Operating Items

The change in non-cash operating items is comprised of the following:

	(thousands of \$)					
	six months ended June 30					
		2015		2014		
Accounts receivable	\$	(11,513)	\$	(9,329)		
Unpaid claims recoverable from reinsurers		20,113		(26,265)		
Reinsurers' share of unearned premiums		(8,204)		(3,876)		
Deferred policy acquisition costs		(834)		(735)		
Accounts payable and accrued liabilities		(7,570)		(445)		
Premium taxes payable		(11,643)		(10,497)		
Amounts due to reinsurers		6,093		5,672

Unearned premiums		5,767		3,156		
Accrued pension liability		(692)		(497)		
Provision for unpaid claims		(9,099)		38,852		
	\$	(19,836)	\$	(3,844)		

10. Employee Salaries and Benefits

The Corporation incurs salaries costs, retirement benefit costs associated with its defined benefit pension plan, defined contribution plan and its defined benefit service recognition plans and other benefits costs. The Corporation allocates a portion of these costs to the Saskatchewan Auto Fund for those employees of the Corporation who provide service to it based on a cost allocation framework. These amounts have been disclosed separately in this note.

The Corporation allocates expenses incurred to the various operating functions. The Corporation includes employee salaries and benefits in the claims incurred and administrative expense line on the Consolidated Statement of Operations.

The total salary and benefits expenses incurred during the period are as follows:

	(thousands of \$)									
		three months	ende	ed June 30		six months e	nded June 30			
		2015		2014		2015		2014		
Salaries	\$	30,806	\$	30,714	\$	61,178	\$	60,757

Defined benefit service recognition plans		196		214		391		429		
Other benefits		5,291		5,249		9,216		9,306		
Total salaries and benefits		38,170		38,080		74,437		74,110		
Less: Allocation to Saskatchewan Auto Fund		(23,245)		(23,518)		(45,332)		(45,770)		
Salaries and benefits incurred in SGI CANADA	\$	14,925	\$	14,562	\$	29,105	\$	28,340		

Defined contribution pension plan

The Corporation has employees who are members of the Public Employees Pension Plan, which is a defined contribution pension plan. The Corporation's financial obligation is limited to those contributions made on behalf of the employees for their current service.

Defined benefit pension plan

The Corporation has a defined benefit pension plan for certain of its employees that has been closed to new membership since 1980. Current service costs of this plan are charged to operations on the basis of actuarial valuations, the most recent valuation being as of December 31, 2013. The next valuation is anticipated to have a valuation date of December 31, 2016.

The actuarial valuation is measured using management's best estimates based on assumptions that reflect the most probable set of economic circumstances and planned courses of action. The estimate, therefore, involves risks that the actual amount may differ materially from the estimate.

Pension expense for the defined benefit pension plan is as follows:

	(thousands of \$)												
	1	three months	ende	d June 30	six months ended June 30								
		2015		2014		2015		2014					
Current service cost	\$	-	\$	5	\$	-	\$	10					
Interest cost		27		34		55		68					
Pension expense	\$	27	\$	39	\$	55	\$	78					

Defined benefit service recognition plans

Pension expense for the defined benefit service recognition plan is as follows:

			(thousar	nds o	f \$)		
	three months	ende	d June 30		June 30		
	2015		2014		2015		2014
Current service cost	\$ 54	\$	53	\$	107	\$	104
Interest cost	142		161		284		325
Pension expense	\$ 196	\$	214	\$	391	\$	429

Actuarial (gains) losses recognized in other comprehensive income (loss)

Other comprehensive (gains) loss results from changes to actuarial assumptions used to calculate the liabilities of the employee benefit plans and differences in the actual return on employee benefit plan assets versus estimated returns on these assets. The discount rate is the only key assumption that changed during the period, as follows:

Discount Rate	Defined benefit pension plan	Defined benefit service recognition plans
December 31, 2013	4.30%	3.80% - 4.00%
June 30, 2014	3.80%	3.30% - 3.50%
December 31, 2014	3.70%	3.20% - 3.30%
June 30, 2015	3.40%	2.90% - 3.10%

Actuarial (gains) losses recognized in other comprehensive income (loss) are as follows:

	(thousands of \$)					
	2015		2014			
Cumulative actuarial losses, January 1	\$ 5,219	\$	5,328			
Loss recognized during the first quarter	728		661			
(Gain) Loss recognized during the second quarter	(784)		(226)			
Cumulative actuarial losses, June 30	\$ 5,163	\$	5,763			

Key management personnel

Key management personnel are those persons having authority over the planning, directing and controlling activities of the Corporation, and include Board members, President and Chief Executive Officer, and Vice Presidents of the Corporation.

Key management personnel compensation is comprised of:

			(thousa	nds o	of \$)			
	three months	ende	d June 30		six months e	nded .	June 30	
	2015		2014		2015	2014		
Salaries and benefits	\$ 1,555	\$	1,433	\$	2,339	\$	2,193	
Post-employment benefits	10		10		20		20	
Contributions to defined contribution plan	68		68		135		133	
	\$ 1,633	\$	1,511	\$	2,494	\$	2,346	

11. Facility Association Participation

Through its subsidiaries, the Corporation is a participant in automobile residual market and risk-sharing pools, whereby companies in the industry are required by regulation to provide automobile insurance coverage to high-risk insureds.

Facility Association transactions recorded in the Corporation's financial results are as follows:

			(thousar	nds o	f \$)			
	three months	ende	d June 30	six months ended June 30				
	2015	2014 2015					2014

Net loss	\$ (198)	\$	(334)	\$	(215)	\$	(338)	

12. Select Operating Information

The Corporation provides property and casualty insurance directly in Saskatchewan, and through subsidiaries operating in Alberta and Manitoba, Ontario and, prior to July 1, 2014, the Maritimes (where Maritimes represents Prince Edward Island, New Brunswick and Nova Scotia). The performance of each subsidiary is reported separately to the Corporation's Board of Directors. The product offerings vary across the jurisdictions, but all products offered are considered property and casualty insurance.

13. Contingencies

In common with the insurance industry in general, the Corporation is subject to litigation arising in the normal course of conducting its insurance business. The Corporation is of the opinion that this litigation will not have a significant effect on the financial position or results of operations of the Corporation.
